

Conclusion of the Second EASTS Volunteers' Meeting

I'd like to thank everyone for their very active discussion in contributing your views towards the proposed programme: so I'd like to summarise what we agreed, or tentatively agreed.

- On the tentative network, we will form a tentative IRG02 Network, so to allow for the exchange of ideas; anyone who'd like to share their views can post it and other members can access. According to the arrangement, anyone who'd like to be members of that tentative network, please give your name when you leave this room.
- With the Asian Transportation Research Network, I think we will have further discussion; it is not conclusive tonight, so we will continue with the discussion.
- There are also good discussions on the proposed project to ADB, so I believe the Secretariat will incorporate the suggestions we give to the proposal. I think these suggestions might have an effect on the version; so the version will have to be changed accordingly. For the EASTS IRG02 as a presenter of the proposal, we will actually convey this to the participating members to get an endorsement. If ASEAN is going to participate as a joint name, that will make it even more promising.
- On the special session at the East Surabaya Conference, it depends on a subsequent discussion with the organizer of the Conference.
